### *Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 2004/0097635 to Fan et al. discloses forming a carbon nanotube film used as a thermal interface material by growing the nanotubes on a catalyst layer, enclosing the nanotubes in a polymer matrix, and then peeling the nanotube-containing polymer layer from the substrate. Fan does not teach forming the nanotubes in a porous material layer that is subsequently separated from the substrate.
